

Mission report – The resin creek curse

Party: Achillea – Lyssara – Natasha – Xandra

Objective: Find the great elk of resin creek or West towards the old hag to deal with the blight.

Lyssara started another adventure towards Shu Feng Keep. Together with Achillea, Xandra and a new face Natasha. The vineblight has been struggles in Resin Creek.

We went for half a day's travel from Everplains to Resin Creek, following the river. The weather was also becoming very hot. The group split up to get some food for a camp. After getting some food, we decided to make a campfire and have a rest.

Yet while we were preparing for the camp, we had a feeling someone was watching us. So, me and Natasha started to sneak around, go on the trees and try to follow the lead. But we only found a triangle mark with a skeleton mouse inside, which was very unsettling.

The next day we went back on track to Shu Feng Keep. We wanted to get some offerings for the great elk. We placed it on the ground so it would find us, but after a long time waiting, no one showed up. So, I decided to look around with Natasha.

When we came back, we heard the news that the great elk did come and it appeared to have memory problems, causing from somewhere. The elk is slowly dying.

We decided to make camp there, hopefully some good rest would help us for the next day.

When I woke up, I decided to look at the campfire and remember my friend who I lost in this forest. All because of the ooze. Suddenly a dark figure with a lamp looked at me and gestured that I should come closer. Without alerting him, I tried to wake up my friends. I then decided to go closer and look at the figure.

It looked like an elf with green eyes... Nothing familiar to me. He calls himself "Lord of the Riverlands", doesn't even ring a bell to me. He offered me 3 books, all of them that could solve a problem of this world... One specifically about the ooze in this forest...

In exchange, he wanted to have a piece of our bounty, any piece... That sounded very suspicious to me. He even heard about my friend Beackberry becoming a chimera in this forest, listened to us all... tempting me to take the deal so I could prevent everything that can happen in this forest...

With one deep breathe in and out... I decided to decline his offer, knowing this is not what Beackberry would want at all... So, he disappeared... Later, I found out from my allies that it was a demon possessed by strider Rudy. Never would I have thought it would happen.

The next day, we decided to go West to go to the Hag's Liar. Over there we found a hole to go down. Beneath there, there was another hole with ooze inside, roots of a plant and 9 undead corpses. The plant was controlling the corpses which it also had a trap, the roots of it was in them, and it started to attack us. But we had gone up from the hole and started to shoot them down.

After killing all the zombies, we found a gem, a gem of brightness.
